We look forward to hearing from you!

SFU

The Sigmund Freud Private University (SFU) was accredited as a private university by the Austrian Accreditation Council in 2005. Individual support, dialogue with teaching staff, and a high degree of practical relevance are the hallmarks of the high-quality degree programmes at the SFU. In addition, the close link between research and practice promotes the acquisition of knowledge in a creative teaching and learning environment. In addition to the main university in Vienna with its four faculties of Psychotherapy Science, Psychology, Medicine, and Law, the SFU has campuses in Paris, Milan, Ljubljana, Linz and Berlin.

We don't just start careers
We encourage personality

Bachelor programme (BSc.) Psychology

SIGMUND FREUD
PRIVATE UNIVERSITY BERLIN
PSYCHOLOGY **PSY**

What characterises the psychology degree programme at the SFU?

- dedicated teaching and research
- individual support and mentoring
- learning in small groups
- personal contact with the lecturers
- early involvement in research projects
- practical relevance from the 1st semester
- the choice of different payment models for tuition fees

Admission criteria

- In addition to the general admission requirements (university entrance qualification), a letter of motivation is required.
- No numerus clausus; the decisive factor is personal aptitude for the respective degree programme, which is determined via an individual admissions interview.
- University entrance qualification examination (If you do not have a higher education entrance qualification, it is possible to take an entrance examination at the SFU Berlin).

Academic degrees

- Bachelor of Science (BSc.)

Duration of study

- 6 semesters/180 ECTS

Accreditation

The Bachelor's degree programme in psychology is an accredited university degree programme in Austria.

The academic degree »Bachelor of Science« is awarded in accordance with Austrian law.

Bachelor programme Psychology

All our psychology degree programmes are based on the same principles, objectives and values: basic training is practice-oriented and takes place as far as possible in direct connection with existing practice and care facilities.

All courses of an applied character are conducted in small groups. The individual supervision of students by professors and assistants, which is entirely geared towards personal support, is guaranteed by our open-door policy.

Studying psychology prepares students for a wide range of career opportunities. This wide spectrum of career prospects is matched by a broad range of research-based and research-guided teaching, especially in the Bachelor's programme. In order to promote a readiness for interdisciplinarity from the very beginning, teaching is also offered in subjects that directly border on psychology, including sociology, communication and linguistics, historical anthropology, and economics. In contrast to the primarily natural science-oriented study programmes at Austrian and German state universities and colleges, the curricula of our psychology study programmes are more oriented towards social science, cultural science, and the humanities. In addition to individual support, we offer numerous opportunities for international networking, e.g., internships abroad or exchange semesters at other SFU locations in Austria, France, Italy, or Slovenia.

Bachelor Psychology Curriculum
